

INTRODUCING NAVORI v5

A new dimension in professional digital signage solutions!

Navori v5 provides an unparalleled level of administrative control for digital signage network operators.

Here are some of Navori v5's new management features:

1. ADVANCED LIBRARY MANAGEMENT:

Navori Server administrators can now assign content to global and local media libraries. Global libraries are shared amongst multiple Groups while local libraries only apply to a single Group.

2. DELEGATE NAVORI MANAGER RIGHTS:

Navori Server administrators can now assign two levels of rights to Navori Managers (Manager Level 1 can perform most tasks and update Players while Manager Level 2 can add and update content on the Server but cannot update the Players).

3. NEW MANAGER FEATURES AVAILABLE ON ALL MODULES:

Multi-level management is available to both Windows and Web Client users.

WHO WILL BENEFIT FROM THESE FEATURES?

- Advertising space network owners will be able to update hundreds of Players with both local and global content at a click of a mouse.
- Digital signage network operators will be able to extend or restrict Manager's rights via predefined user profiles.
- Corporate and educational network administrators will be able to publish global content across multiple sites while providing some management flexibility at the departmental level.

OTHER NEW FUNCTIONS:

- New Extended Media Boost with scheduled triggering based on time and day of the week.
- Crawling Banner parameters can now be saved and retrieved within each Group.
- Group profiles let users store common Player PC settings such as screen resolution.
- PowerPoint 2007 and all QuickTime 7 media types are now supported.
- New digital TV Tuner add-on supports analog and digital TV signals including HD.

IT'S TIME TO UPGRADE!

- Multi-tiered network management.
- Lowest operating costs.
- Highly scalable.
- Self-hosted software platform.

Navori v5 includes several new features that further enhance usability.

Small deployments will benefit from an interface that remains simple and easy to learn.

Large network operators will appreciate the new multi-level administrator accounts and enhanced Media Library.

There is something for everyone in Navori v5 so we invite all current customers to download a trial copy from the Navori web site: www.navori.com or contact your local Navori representative for a demo.

NEW VERSION NAVORI 5

NEW SUPPORTED OPERATING SYSTEMS

Navori v5 Controller, Player, Server Standard Edition and Windows Manager Client now support all Windows Vista versions and all Windows XP versions.

Navori v5 Enterprise Server now supports Microsoft Server 2008 as well as Server 2003.

WEB MANAGER VERSION 2.0 IS NOW AVAILABLE!

Here is a list of the new features in Navori Web Manager version 2.0:

- Mosaics can now be edited in Navori Web Manager.
- New proof of playback reports (listed in chronological order).
- Automatic scaling and positioning of the crawling text banner.
- The length of videos, PowerPoint 2007 and Flash files is now detected automatically.
- Support for HTML, TV Tuner and RS232 media types has been added.
- Date and time of the last update per Player is now displayed.
- Web Manager interface is available in English, French, German, Dutch, Italian and Spanish. New languages can be added as required.
- Web Manager now has 2 level of administrative rights (full rights or add/update content only)

NEW PRODUCT: NAVORI PLAYER WATCHDOG

WatchDog provides 99.99% player reliability.

Navori WatchDog is a new module available that monitors the health of the Player PC and ensures:

1. Navori Player is running properly.
2. Screens are displaying their content and the Player is continuously up and running.
3. If a problem occurs, you are automatically alerted by email.
4. WatchDog will either relaunch the Player application or reboot the Player PC as required.

NEW SUPPORT AND UPGRADE POLICY:

In November 1st 2008, Navori implemented a new system designed to enhance the quality of the support we offer. From now on, all support requests must be sent via your extranet account. Support requests may only be sent based on actual software licenses for which you have subscribed to the **software support plan**. Navori will respond to each support request by email within 24 hours (weekdays).

Customers who do not subscribe to the **software support plan** will not be able to contact us, nor will they have access to software patches. However, all users will continue to have free access to the Navori knowledge database and all online tutorials.

UPGRADING YOUR NAVORI SOFTWARE:

There is no additional cost to upgrade if you are currently covered by the Navori **software support plan**.

UPGRADING IS AS EASY AS...

1. Downloading the Patch Updater.
2. Run the Patch Updater.
3. Upgrade your Navori activation key (Controller, Server and Manager).

Simply download the patch updater for your software package from the Navori extranet under **Downloads > Patches**.

Updating your Player

Users upgrading their 3.03 and 3.04 Players will not have to generate new activation keys. The activation keys for these Player versions are compatible with Player v5. Users of previous versions should contact Navori to confirm their status prior to running the updater.

The Player updater can be either run manually on each Player or you can send it to all your Players via Navori Server update. For details on updating your software via Server update, refer to the Knowledge Database on the Navori extranet.

Updating your Controller, Server or Windows Manager Client

Users upgrading from any previous version of Controller, Server or Windows Manager Client will need to update their activation keys. Your older activation key will be invalid after you run the v5 updater. We highly recommend users backup the contents of their Media Clip folder and their databases prior to launching the updater.

To upgrade your software:

- Log in to the Navori extranet.
- Select My Account > History > View Report.
- Locate the license to upgrade and then click Edit.
- Select Upgrade License
- Follow the instructions on the Software Updates page.

All request for information about new features should be directed to your local Navori representative.

For technical support questions, please use the Extranet Support Ticket.
